

INDP

INTERCULTURAL NETWORK for DEVELOPMENT and PEACE

Wish you
a good day

An invitation to an inner journey

Who care for this child ?

This woman in
the fields ?

The village
community ?

The
administrative
set up ?

And what if
it is you and me !

Have we ever
thought of ?

His body and his intelligence
are his sole assets

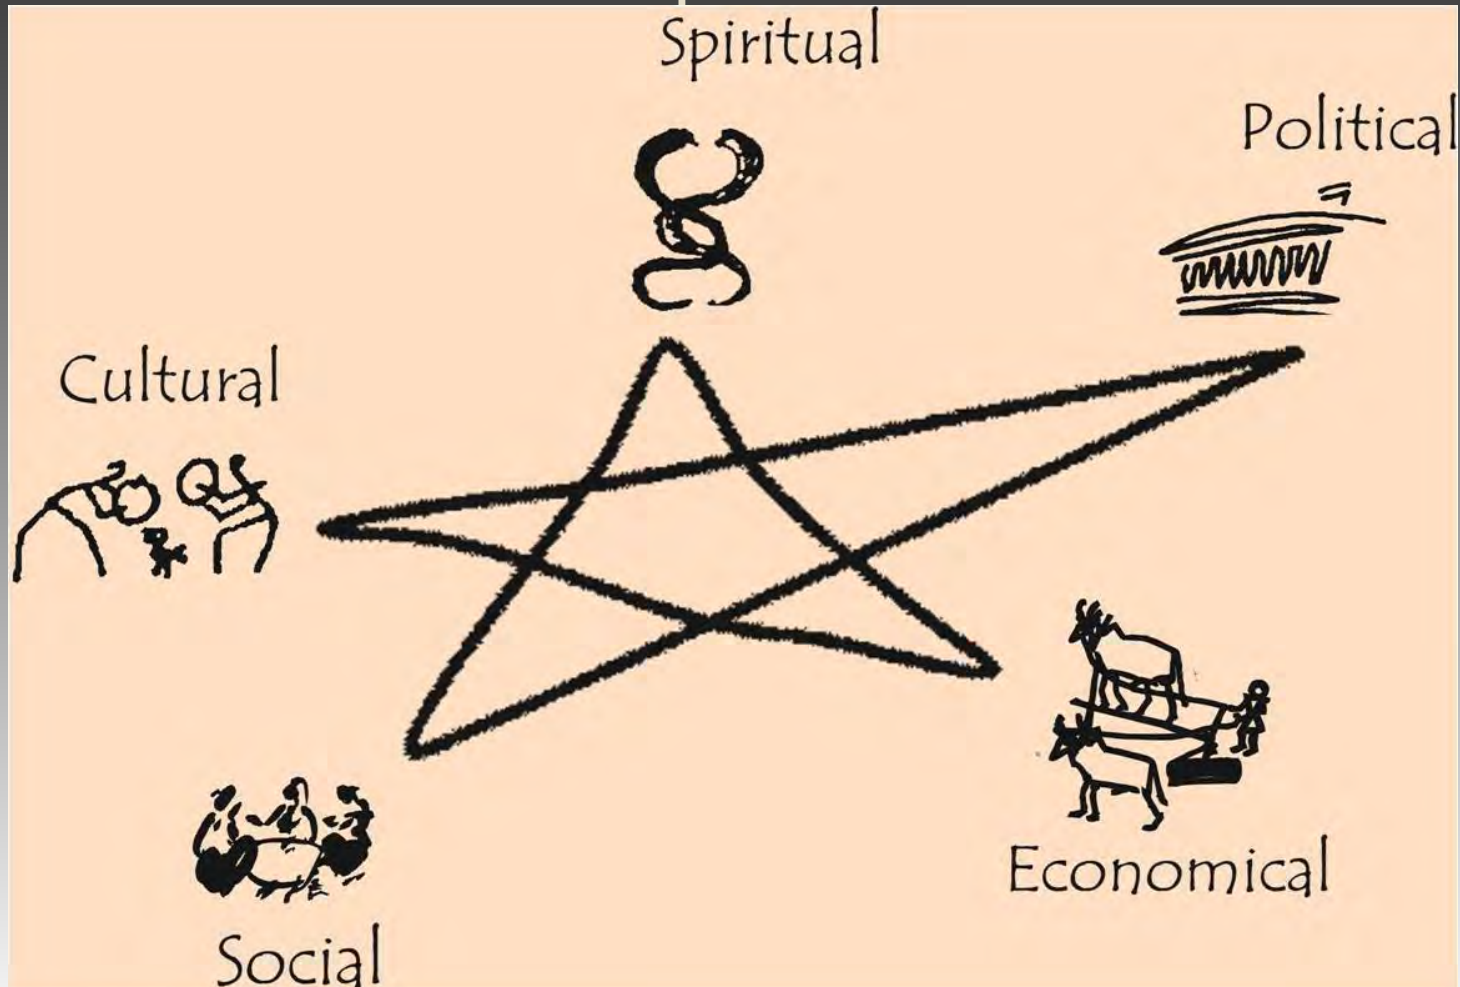

For which he is
dependent on adults
who should prevent
rather than cure

Children and adults
are to be educated
beyond the health
aspect

Opening to wider aspects lead to HOLISTIC development

Take into consideration communities' virtues and knowledge still transmitted orally in some contexts

Come forward
to supplement, enrich
and adapt that
knowledge for
sustainable
and final solutions

As holistic development is synonymous of stability, harmony and peace, one should denounce its obstacles referring to ethic and universal values

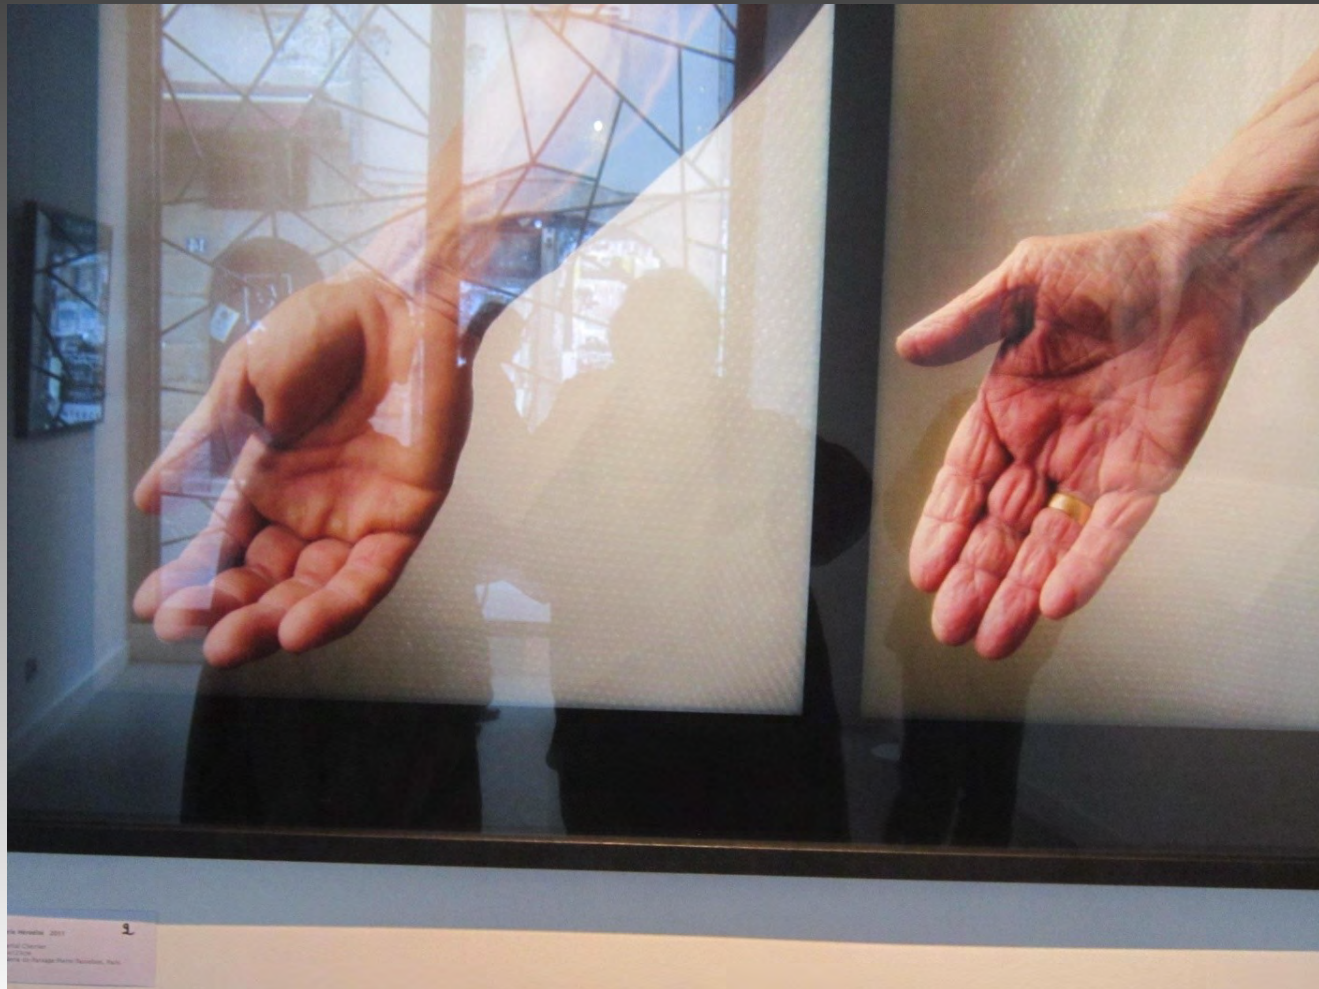

“Child health workers and paediatrics” go with
“children”, “future generations”, “hope”
Let hope inspire our discussions and resolutions

Let us debate on our analysis, results, doubts and proposals to find new approaches and perspectives

Children, healthy in mind and body will
become active citizens and will take care of us

Let us
have a
meaningful
exchange
