ICF 3D- Change of Perspective

Conclusion

- **The ICF (-CY) is a 3- dimensional, non hierarchical system**
- **It is able to give a complete picture of the patient and the life he is living in**
- **Rehab and Orthopedic Devices belong to the environmental factors**
- **Both have a major role in the life of physically disabled people**
- **Rehab and Orthopedic Devices can be facilitators, but also barriers**
- **It takes time and intensiv testing to find out which devices achieve the goals of the patient/family**

**Thank you
very much
for your
attention!**
